EDUCATION

Technical Computer Science Technician

KINAL Technical Educational Center, Guatemala, Zone 7

01/2022 - 10/2024

Engineering Computer Science and Information Technology

Universidad del Valle de Guatemala, Guatemala, Zone 16

2025 - 2030

EXPERIENCE

Freelance Developer

WoowbeGt, Guatemala

07/2025 - Present

- Development of full-stack applications leveraging NestJS for scalable backends and Next.js for dynamic frontends.
- Integrated Cloudflare Images to optimize cloud storage, delivery, and pipeline for application assets.

Freelance Web Developer

Recigua, Guatemala

01/2026 - 02/2026

- Developed robust RESTful endpoints using TypeScript and NestJS to automate ticket generation and weight calculations for a recycling plant.
- Built modern, high-performance user interfaces with Next.js, ensuring responsive design and web development best practices.
- Designed a relational SQL database schema and containerized the application using Docker for seamless deployment.

Backend Developer

Asigbo

01/2026 - Present

- Coordinated and assisted in migrating the ASIGBO (Isabel Gutiérrez de Bosch Scholarship Recipients Association) portal from JavaScript to TypeScript, improving codebase maintainability and type safety.
- Maintained the platform by refactoring legacy code and implementing high-priority new features.

PERSONAL PROJECTS

Backend Developer

Waterway

- Implemented a georeferenced reporting system utilizing latitude and longitude coordinates for real-time mapping of river pollution incidents.
- Engineered the backend coordination logic for community cleanup events, streamlining volunteer registration and organizational workflows.

Full Stack Developer

Earth-Way

- Engineered robust backend services using Spring Boot and PostGIS to power a georeferenced reporting system with real-time mapping capabilities.
- Developed core full-stack modules for reports, events, and organizations, leveraging Next.js for high-performance user interfaces.
- Managed the application development lifecycle utilizing SCRUM methodologies to ensure iterative delivery and seamless team collaboration.

SKILLS

<i>Programming Languages</i>	JavaScript, TypeScript, Python, SQL, Java, C++
<i>Technologies</i>	Node, React, Next.js, Nest.js, Express.js, Spring Boot, Hibernate, Git, Docker, AWS S3, WSL
<i>Databases</i>	PostgreSQL, MongoDB, MySQL, Neo4j
<i>Languages</i>	English (Intermediate, B1), Spanish (Native)

AWARDS & ACHIEVEMENTS

Isabel Gutierrez de Bosch Scholarship 2024 Juan Bautista Gutierrez Foundation
Full scholarship awarded to the top 50 students in the country. Covers tuition, monthly fees and academic materials, plus includes professional development with mentoring and coaching.

1st Place, Hackathon “Rastreando el Origen” 2025 Senacyt, Copernicus and RedClara
My team and I won first place in the hackathon. Our project consisted of a platform for contamination reports, with a social feed and an interactive map that worked with AI showcasing Copernicus Data.
